Abbildung 19

<http://www.sinnergiak.org/en/events/ii-european-school-social-innovation>

The aim of this Summer School was to present the three main debate topics on social innovation worldwide. The primary goal of the Summer School was to understand social innovation. The way in which social innovation, its corresponding factors and dimensions, is understood and has implications for academic studies as well as for the development of social innovation policies in both organizations and countries.

The second objective was to discuss different models of measurement of social innovation. The identification of indicators on social innovation enables the development of discipline and the design of public policies. Finally, the purpose was to present interesting cases that may illustrate how social innovation works in the practice and how it may be scaled to other social environments.
